Republic of Panama

THE KOREAN EXPERIENCE: LESSONS FOR LAC
DEVELOPMENT
Panama has the 2nd most competitive economy in Latin America, according to the latest report by the Institute for Competitiveness ADEN, maintaining its strong performance in infrastructure, economic stability and leading other countries access to technology.”
Bureaucracy is a problem that continues to advance the development and is associated with inefficiency, laziness and waste of resources.

- **Government procedures** are in most cases unclear and used contrary to the **spirit of the laws** and regulations that create them.

- Sometimes the **process** itself is considered more important than the **decision**.

- Creating more and more **rules and processes**, increasing complexity and decreasing their coordination, facilitating the creation of conflicting rules.
FUNCTIONS

- Plan and develop bi-annual plans of national policies and plans for innovation to transformation and modernization.
- Coordinate the development of initiatives related to the use of Information Technology and Communications (ICT's) by public entities.
- Monitor and periodically inspect the state of technological systems to verify compliance with the standards or to identify conditions that need to be corrected through concrete actions.
- Organize and execute plans and training programs and training of staff in the department of computer science and technology units of public entities.
- Provide advice and consultancy services to public entities on design, development, Implementation, review of systems or computer procurement of goods and services; as well as providing assistance in the re-engineering of processes and procedures of entities.

Mobile Government Services

major challenges

- It is necessary to develop wireless and mobile networks and the related infrastructure, as well as the software.

- The Government should facilitate access to government information and mobile services to citizens to increase citizen participation.

- It is necessary to improve the security of the mobile public service, since it usually uses public signals that are relatively easy to hack.

- It should establish the legal basis for mobile government services.
Connectivity and Improvement of the Infrastructure Technology
The project currently offers 1,105 sites accessed through standard wireless network technology - WiFi, Free Internet, in public places such as schools, parks, health centers, gyms, among others. The implementation was done in 3 phases, covering fully 41 cities or villages, this figure contemplating rural communities in areas of difficult access, nationwide.
• The total number of new users in the period was 665,669 totaling more than 1,283,179 users since the network was activated in January 2010.
• 42% of youth aged 19 to 35 years are the ones who make use of technology, and early adopters.
• 42% of users are of school age.
• A total of 346,876 users use the Internet in the last three months of 2013 (October, November and December).
• We have 1,354,349 unique users connected between January to December 2013.
• The total transmitted data was 153,801 153.8 gigabytes or terabytes between January to December 2013.
e-Government and Citizen Participation in Local Governments (Mobile)

Platform that covers everything related to information, communication and services using as a key element the mobile device.

**Information:** the citizen is constantly informed of what is happening in the city, thanks to the space wall, fed by the active agents of the municipality (Citizens, Governments, Companies) as well as through systems OPEN DATA (Systems Traffic, Citizen Alerts, News)

**Communication:** Active Citizenship, guaranteed by Citizen Chat modules, tool for dialogue and debate and vote on initiatives, social media and technology to ensure an active role for citizens.

**Services:** this complete tool of citizen satisfaction experience through eGovernment tool which allows us to place online all charter service both government and business, covering both the pipeline and even the payment of taxes from mobile, all increasing the efficiency and management of staff.
